

Allegheny County Police Training Academy

Identification Card Example:

Card Front

Card Back

EXAMPLE

Police Identification Cards can be produced using individual department badges or patches as a watermark, or as an actual photo on the card. We have the ability to customize the department's design to meet your needs. Signatures can be added with ink pen or electronically. Accreditation and other seals can be added to the identification cards, as well as having the card read horizontal or vertically.

Photographs may be taken at the academy or you may send them on a CD. We are also in the process of placing a form on our web page that the department Chief's can fill out with the individual officer's information, and mail back to the Academy to be placed into the data base. The information on the form will include all the data needed to comply with the new Retired Law Enforcement Officer's Identification and Qualification Card as outlined by MPOETC. All or only part of the data base information may be placed onto the identification card for individual department's use.

Please contact Officer Andy Marculaitis at the Allegheny County Police Training Academy for any questions or to get started with ID Cards.
